With these few remarks W. H. G. feels convinced that it only needs "one trial"—as it will speak volumes for itself.

For Williamson and Natise.—By the Emily almost, or Widnesday, at rities, he replied by instances where, when the civil authority of Scotland had decided just as the Prince. mary Judge had done in his case, an appeal to the Imperial Legislature had been made successfully. He mary Judge man done made successfully. He did not care for the question of property involved, but he felt that he had suffered a great wrong, and it was a maxim of law that there was no wrong without a remedy. It was well known that he had expended for public purposes, chiefly in the cause of education, a private fortune, which, if he had retained it, would now be worth £30,000 or £60,000. And he now only asked for justice.

Mr. HAY: Though he had not voted for the exclusion of clergymen, he had nevertheless apprehended serious evils from their introduction into that House. And if they entertained this motion, there would be no end to ecclesiastical quarrels, for of all ersons ecclesiastics were the most disputatious. Let the dispute in question be dealt with by the courts of law, and, if after they had finally dealt with it and a wrong was left unredressed, then it would be time enough to appeal to that House. Admitting all the as alleged, still that House wa proper tribunal. And such an enquiry as was prosed would hardly tend to bring about the recor

Mr. BLACK doubted the propriety of the motion, but, if it were pressed, he should vote for it. He should not give his vote as a Minister, but

simply as a member of that House.

Mr. Fon-ran concurred in the views expressed by
Mr. Hay. He acknowledged the great services of Dr. Lang, especially in the cause of education. Still he thought there was no cause for the interference of the Legislature

Mr. Darvall said the case was one of dispute a trust deed. The law had been invoked, and so far it had decided against the reverend gentleman. He, however, had his right of appeal. If they began enhowever, had his right of appeal.

Mr. DALLEY saw nothing in the resolution that had reference to the proceeding before the courts of law. It simply proposed an enquiry into proceedings which he thought demanded enquiry.

Mr. PLUNKETT thought the House had no power,

even if enquiry were to take place, beyond expressing its sympathy. He advised the withdrawal of the

Leave was granted.

Mr. Robertson moved that the seat of Charles Cowper, Esq., for East Sydney, be declared vacant, but, after an expression of opinion from Mr. Scorr, Mr. Jones, and other members, that the motion would contrary to law, it was withdrawn.

Mr. Oxler brought up his Education Bill, which was read a first time, ordered to be printed, and read Mr. WINDEYER obtained leave to introduce a bill to

amend the Cattle Driving Act.

The Judges' Pension Bill was considered in com-

mittee, and reported with amendments.

The adjourned debate on the second reading of the bill for shortening the duration of Parliaments was resumed by Mr. Piddington, who opposed the measure urging that no necessity for it had been shown, while they were taught by experience that frequent elections were productive of great evils to society.

Mr. PARKES, Mr. GARRETT, Mr. Dickson, and Mr. ROBERTSON supported the bill.

Mr. Forster and Mr. Rotton were opposed to the

bill, and saw no necessity for its introduction.

Mr. Oxley called attention to the state of the House, and, on counting, the Speaker said there were only eighteen members present, and he therefore adjourned the House (ten minutes past eleven o'clock) till three o'clock on Tuesday next.

THERE is an impression abroad that if th Legislative Council be not reconstructed forthwith, the present holders of seats will retain nominated after the expiration of five years will have a valid protest against any reform which would disturb their appointment. Neither opinion is correct.

The persons now constituting the Upper House will cease to be Legislative Councillor when five years have expired, and the Executive will have power to make a selection entirely new. Those who may form the second series could not on personal grounds obstruct legislative changes The Imperial Act, adopting Mr. WENTWOKTH' Constitution Bill (fourth section), provides that it shall be lawful for the Legislature of New South Wales to make laws altering or repealing all or any of the provisions of the subject to the two-thirds clause-that is the assent of two-thirds of the members of each House was required. This condition, how has been repealed, and now alterations in the Constitution Act are subject to no special restrictions excepthat any bill affecting the constitution of the Legislative Council must be reserved for he MAJESTY'S approval. The third clause of WENTWORTH'S Act provides that the tenure of scats in the Legislative Council "shall be ject to the provisions thereinafter named for vacating the same, and for altering and amending the future constitution of the said colony.

The assertion of urgency in the bill, therefore on the supposition that the delay will render the present appointments permanent, is erroneous. We are not sure, however, that those who are inclined to take a conservative view of this question, would gain anything by delay. On the lapse of the five years the ball will be in the hands of any Ministers who may happen to be in power, and there is nothing a very conscirutions service. neous. there is nothing except conscientious scru-ples to prevent them from using their party advantage to the utmost, filling up the Legisla-tive Council with their devoted adherents, and

silencing every voice but their own. References to the personal interests of the members of the present Legislative Council in obstructing any reform of their House, are in that bad taste which is characteristic of our political discussions. The gentlemen that com--having a stake in the colony as large political experience as extensive—and having advantages of education as undoubted as an that are found in the Assembly. Why they should be held up, therefore, to public ridicular as persons called upon to take part in assassination, suicide, felo-de-se, and what not, we not imagine, except that a taste for bad jokes, like the love of gin, is characteristic of some sections of our political parties. Even the lower motives which may operate in the minds of legislative councillors are in favour of the Ministry. Those who assent to their policy may expect to retain their costs when the favour th seats when the five years clapse, supposing the bill should be delayed, or be vetoed by the

A question of great delicacy-whether the bill should be brought first into the Lower or the Upper House, seems likely to produce some degree of irritation. There are strong reason on both sides, but in our opinion they prepon-derate in favour of the course proposed by the Ministers. There is certainly no legal objection to the introduction of the bill into the Lower House. It is impossible that the Constitution should have provided for its own americal stress enactment, and at the stitution should have provided for its own ante-lioration by legislative enactment, and at the same time place it in the power of one or other of the branches of the Legislature to stop in limine any discussion upon the subject. If the Lower House had no power to deliberate upon the bill contemplating the change of the Legislative Council, it is obvious that the

It offers some faculties for that representation interests, without which no country can ever enjoy good government. It is not at all improbable, however, that there may improbable, however, that there may be forty candidates required to constitute and to replenish an Upper House of thirty since vacancies are to be supplied by the persons who possess the smaller number of votes. According to the provision of the bill none having less than a thousand votes would be qualified, but unless there be some means aken to compel electors to vote, we apprehence that there would be scarcely sufficient to con stitute a House, and to provide for the probable vacancies during its parliamentary existence.

These, however, are points which must be well considered in all their ramifications, and, if a desire to secure good and effective government should prevail over party prejudice, it is not impossible that we may yet see a solution of this great difficulty which has so long haunted our political life.

We understand that at the earnest solicitation of Sir George Bowes, Sir CHARLES Nicholson has been induced to accept the onerous, but honourable, office of President of new Legislative Council of Queensland Sir Charles filled for many years the Speaker-ship in our Legislature, when it consisted of a single Chamber. His knowledge of the laws of Parliament, his perfect and impartiality, gave a tone to that assembly of unappreciable value at the time. We be-lieve that Sir CHARLES has been induced by the irresistible argument of gratitude to the Crown, and the possibility of great service to the Legislature of Queensland to suppress his the Legislature of Queensland to suppress modistasts for official life. It is strange that a gentleman, of whose public services every pergentleman, of whose public services every person in power since his retirement has expressed the deepest sense, should never have been offered—so we presume—a seat in the Legislative Council of New South Wales. It is a disgrace to the colony that Sir George Bowen should have found Sir CHARLES NICHOLSON disengaged; and have been able to claim his aid uupn this ples in the important task confided to his charge.

We do not know whether the people Queensland will have sense to appreciate the assistance given by Sir Charles at his own cost, but if they could obtain a few more such men the colony would at once take rank in the estimation of England. found the advantage of a prestige, in the mone-tory confidence which it inspires, as well as the British enterprise it promotes.

Business during the past week has been ex-teedingly dull, and although at this time of the year it is usual for trade to be slack, still there is now an unusual inactivity in almost all our markets. The tightness of money in Melbourne and the failures that have lately taken place there, although they have not affected us, have, perhaps, induced a greater degree of caution, and this may account for the little desire there is to enter into transactions of any magnitude. Since lest Saturday we have had no less than five ships arrived from London with heavy f general merchandise, and this there fore must for a time check any improvement in our markets, and has consequently caused buyers to operate only to meet present requirements.
